Hardway, Dayton, DO 2/28/2025 23:08

Cosign Required

PROCEDURE NOTE -EMERGENCY INTUBATION

Informed consent, after discussion of the risks, benefits, and alternatives to the procedure, was not obtained due to the urgency of the procedure and the patient condition.

The patient was identified using two patient identifiers: Yes.

Relevant documentation along with required diagnostics are available in Epic: Yes

The correct procedure was verified: Yes

Procedural site identified: Yes

Presence of required equipment, supplies, medications, and/or solutions verified prior to starting

procedure: Yes

Patient allergies identified or reviewed: Yes

Site marking done: Not indicated

Fire risk assessment complete: Yes

A timeout to verify the correct patient, procedure, and site was performed immediately prior to the procedure

Medications given were NA. In line spine stabilization was maintained during the procedure: Yes.

The patient was intubated by Dayton Hardway, DO. A number 7.5 cuffed ETT was placed to 23 cm at the lips. Placement was evaluated by noting: Symmetric breath sounds, End tidal CO2 was confirmed by presence of end-tidal wave form, Improved oxygenation, and No breath sounds over stomach.

Complications associated with the procedure were: none

Smucker, Jordan, the attending was present for the procedure.

Dayton Hardway, DO
